

Soumasish Dasgupta

Full-Stack Developer & AI Enthusiast

dasguptasoumasish@gmail.com • +91 6289320316 • github.com/Soumasish2005

B.Tech Computer Science student at Techno India University with hands-on experience building full-stack web applications using React, Node.js, TypeScript, and GraphQL. Passionate about web-based programming, backend design, and bridging the gap between modern web development and intelligent applications. Actively seeking opportunities to contribute to impactful software teams.

Projects

MULTITHREADED HTTP SERVER (JAVA, NETWORKING, CONCURRENCY) :

Built a production-grade multithreaded HTTP server from scratch in Java capable of handling concurrent GET/POST requests, file serving, and user-agent detection, demonstrating deep understanding of computer networking and concurrency, by implementing thread pooling, socket programming, and HTTP protocol parsing without any external frameworks.

- Implemented a multithreaded HTTP server in Java supporting GET/POST methods, static file serving, and dynamic string echoing using raw socket programming
- Applied thread management and concurrency control to handle multiple simultaneous client connections
- Gained hands-on experience with low-level HTTP protocol parsing, socket lifecycle management, and network I/O

BRAND-SPARK (TypeScript, React, AI APIs, Node.js) :

Built an AI-powered brand identity web application **that generates unique logos and branding descriptions for businesses**, demonstrating end-to-end full-stack product development, **by integrating generative AI APIs into a TypeScript/React frontend backed by a Node.js service**, enabling instant brand creation for any project or team.

- Designed and deployed a full-stack AI web app using TypeScript and React that generates branded logos and business descriptions on demand
- Integrated third-party generative AI APIs into a Node.js backend, managing asynchronous workflows and API error handling
- Built a clean, responsive UI enabling non-technical users to generate professional brand assets in seconds

Experience

- **IBM Virtual Internship — Machine Learning & AI**

IBM Learning | Nov 2025 – Jan 2026

Completed a project-based virtual internship in Machine Learning & Artificial Intelligence, building practical models across supervised learning, deep neural networks, and prompt engineering - and applying concepts to hands-on projects on IBM Skills Network.

- Trained and evaluated supervised ML models using Python (scikit-learn) and deep learning models using TensorFlow.
- Applied prompt engineering techniques to design effective LLM interactions, gaining foundational skills in generative AI.
- Earned IBM certification upon successful completion of all project assessments.

- **Hades — AI-Powered Cybersecurity Agent**

Frontend Developer & UI/UX Designer | Team of 3 | Autumn 2025 | Tech: React, Next.js, TypeScript, Figma

- Designed end-to-end UI/UX in Figma and implemented the web-based AI Developer Kit (ADK) for a cybersecurity agent platform targeting red teamers and bug bounty hunters
- Built the frontend in React/Next.js with TypeScript, integrating with a FastAPI backend to surface AI-driven pentesting, reconnaissance, and vulnerability assessment workflows
- Collaborated in a 3-person cross-functional team to ship and deploy a fully functional product within hackathon deadlines, handling all frontend and design responsibilities end-to-end

Skills

Languages: JavaScript, TypeScript, Java, Python, C, C++, HTML, CSS

Frontend: React, Vite, GraphQL (client)

Backend: Node.js, Express.js

Databases: MongoDB, MySQL, Supabase

Cloud/DevOps: AWS, Docker, Firebase

Tools: Git, GitHub, Figma, Notion

ML/AI: Python (scikit-learn), TensorFlow, Prompt Engineering

Education

B.Tech in Computer Science and Engineering | Techno India University, Kolkata
2023 – 2027 (Expected)

- 9.8 GPA

Achievements

- Won Innovocon Hackathon at JIS College, Kalyani

Certifications

- **IBM Certified — Project Based Experiential Learning: Virtual Internship in Machine Learning & Artificial Intelligence**

Issued by IBM Learning · January 2026

- Courses: Machine Learning with Python · Deep Learning with TensorFlow · Prompt Engineering for Everyone
- Verify : <https://ibmlearning.skillsnetwork.site/certificates/542dab7b-7e37-42e1-8988-a8daba4916a5>

- **AWS Academy Graduate — Cloud Architecting** Aug 2024

- **AWS Academy Graduate — Cloud Foundations** Aug 2024

- **Google Cloud Skill Badges**

- Areas:
 - Generative AI (Gemini, Vertex AI, Imagen) · BigQuery & Data Analytics
 - Kubernetes & Cloud Infrastructure · Cloud Security & Networking
 - Serverless (Cloud Run, Firebase, Cloud Functions) · Looker & BI
 - Document AI & NLP APIs · Terraform & IaC
- Verify: credly.com/users/soumasish-dasgupta.9e617133

- **MongoDB — Building AI-Powered Search with Vector Search** May 2025

- **MongoDB — Building RAG Apps Using MongoDB** May 2025
